BOARD OF EDUCATION

J. McLEAN REED
A. B. M. A., Ohio Northern-Ohio State
Superintendent of Public Schools

March 21, 1944

TO THE MIRROR STAFF:

Permit me to thank you for the privilege of recording my kindest regards and best wishes to the 1944 graduating class. Sincere congratulations to each of our seniors maintaining a satisfactory record of achievement in scholarship, conduct and service.

Such commendation and praise is due you for your excellent participation in the curricular and extra-curricular programs as outlined by our State Department of Education and our own local Board of Education.

While you have excelled in many branches of study and other fields of activity, it has also been your opportunity to evaluate and appraise the world in which you have studied and in which you will live for the next forty or fifty years. You have made many deductions on the basis of what you read, see and hear in a war-torn world as to cause and effect. You may have ventured your opinion as to the best possible solution for present world ills.

You have, however, only begun to study the needs of our present day world. You have learned how constructive attitudes and the value of clear thinking are essential and necessary for a better understanding of the people of the world. You have observed that every nation has something to contribute to the peace of the world and you must begin the development of a sympathetic understanding that will be reflected in the free councils of the world.

Success in any endeavor or your service to mankind cannot be measured in dollars and cents and you are never a failure until you blame your mistakes on another.

According to Harry Emerson Fosdick, you must learn to meet the "musts" in daily endeavor. You must learn to sort the essentials from the non-essentials. You must put first things first; you must like to work and serve for the reward of harmonious, happy and satisfactory living conditions. You must be willing to go the second mile. The first mile is compulsory, but the second mile is voluntary, according to the teaching of The Master. You have discovered that the role call of the world's greatest spirits reveals not a single-mile person, but only men and women who are willing to dedicate their lives for the betterment of mankind everywhere.

In the language of the poet:

No failure you have need to fear,
Except to fail to do your best;
What have you done, what can you do,
That is the question, that is the test.

Sincerely,
J. McLEAN REED,
Superintendent Lima Public Schools.

EDITOR OF ANNUAL MIRROR AND
STUDENTS OF CENTRAL:

A well-known poet once wrote, "The golden opportunity never presents itself but once. Seize then the hour, when fortune smiles and duty points the way."

We do not know exactly what this great poet and philosopher had in mind when he penned those oft-quoted lines. If he meant that the opportunity for success "knocks" but once in the lives of men, then we cannot subscribe to his thinking. But we must notice that he used a certain adjective in front of the word opportunity. He said the "golden" opportunity never presents itself but once. When he puts it that way, I am inclined to think he was right.

Now, what do I have in mind? Just this—a lot of high school boys and girls are yielding to the temptation of getting high wages by quitting school and going to work just as soon as they become sixteen years of age. And what are they doing? They are throwing away that "golden opportunity" of getting a full high school education — that "golden opportunity which never presents itself but once." This high-wage period will soon come to an end and when it does the world is going to bid for the individual who is best prepared. If you quit high school now you will never come back. Statistics show that not one out of a thousand return to finish high school after quitting for two or three years to work.

Another thing, when this war is over, the country is going to need an educated citizenry more than ever before if it survives the shock and the devastation wrought by this World War II. It is going to need educated leaders and educated followers—men and women who can think for themselves and who will not be led astray by every crackpot demagogue who comes along. It is going to take a lot of right thinking and right living to put this old world back in joint. But, with proper leadership this country can emerge into the greatest period of prosperity, culture and progress it has ever known. So let's see to it that you are prepared to meet this post-war period. Let's not wake up some morning a few years hence and find you are both out of a job and high school education.

Truly, on the matter of finishing your high school education, "the golden opportunity never presents itself but once."

Very truly yours,
H. W. LEACH,

Imagine the shock to the New York traffic dodgers if our autoists, instead of honking and whizzing past, followed the example of the London driver. When he saw a pedestrian directly in the way of his cab horse, he drew up, leaned over and gently inquired, "Hi say, sir, may I awsk what are your plans?"
